

**The Strategic Planning Committee - Communication**  
**Written by: Neil Cavaleri**

**Wow ... You did it! We now have a Vision Statement! Thanks to all of you who attended the Community Visioning Session and helped to create the Greenbriar Oceanaire Vision Statement. The session was very well attended. Those who attended were engaged in a lively and interactive discussion. The SPC wants to give a special thanks to Gail Bubenick for leading this effort and all of those who supported her.**

**Here is the Vision Statement the residents came up with!**

# Vision Statement

**The Vision Statement is supported by Strategies that are further defined through Tactics.**

Progress toward the Vision will be measured as part of the implementation.

This is a real milestone for our Community. This will ensure that our Board of Directors and the Committees have a clear focus and guide to what is important to our Community. The Vision and Strategies will help to ensure planning is done taking into consideration our future. The Vision and Strategies will also help ensure the Culture, Lifestyle, Safety and Management of our Community are always top priority. While the Tactics of delivery may change overtime, the Vision and Strategies will remain constant as our guide into the future.

Anthony Manino presented this and received approval from the Board of Directors. The SPC team will start putting together our next steps, working closely with the Committees and the Board of Directors, to ensure the Vision becomes established within Greenbriar Oceanaire.

**Welcome to the New Year from the Strategic Planning Committee!**
