

Breast Intentions  
P.O. Box 926  
Middletown, New Jersey 07748

Dear Friends in Caring,

Thank you for your generous donation and support to Breast Intentions. Below we have listed some of the women that we have helped, BECAUSE of you.

- SR is a 64-year-old single woman who is currently undergoing radiation therapy for her breast cancer. She had surgery and endured complications from her breast reconstruction, consequently the expanders had to be removed. She is a retired hairdresser and does not have much income. SR will be turning 65 next month and is aware that once she is on Medicare, her income will be further reduced. She needs assistance with her household expenses. Because of you we were able to pay her taxes and utility bill.
- SW was diagnosed with stage 1 breast cancer. Earlier this month she had a lumpectomy and will have 33 treatments of radiation. She is out of work. Her husband too is out of work due to hernia surgery. They both have filed for disability but are still waiting for it to be approved. Because of you, we were able to help them with their Jersey Central, NJ Natural Gas and their car insurance. She was grateful and relieved.
- SB was diagnosed in June with 6 tumors in her breast. She had surgery to remove the tumors and will be treated with radiation. She receives \$1100.00 a month from Social Security but with the mounting medical bills, medication and utilities, she is having trouble making ends meet. Because of you we were able to help her with her electric bill
- JH is a 44-year-old divorced woman recently diagnosed with breast cancer. She is having surgery soon and pathology to follow. She lost her home to foreclosure and the their business because her ex-husband has a gambling problem. She is worried about bills because if she can't work, she won't have any income at all. Because of you we were able to help her with her rent and insurance.

- GL was diagnosed with breast cancer three years ago and underwent treatment and a mastectomy. She recently got into a car accident and broke three ribs. While in the hospital she found out her breast cancer had returned with metastasis to her stomach and liver. She and her husband are really struggling - her husband broke his back and had a stroke. They live on his social security and are trying to move to an apartment with affordable rent but they make too much to qualify for this type of housing. Because of you we were able to help with their rent.
- HH is a divorced woman living with her son, his girlfriend and their four children. She tries to contribute to her son and his family but can no longer work due to her treatment. She was recently diagnosed with breast cancer and needs to have surgery and radiation. There is a lien on the house that they are currently living in, the gas has been shut off, and they are behind on their car payment and water bill. Because of you we were able to have the gas turned back on and brought them up to date on their car and water bill.

Thank you again for your kindness to our Breast Intentions patients. You are really making a difference and easing their struggle. Happy Holidays!

Sincerely,

The Breast Intentions Team
